## **General Description**

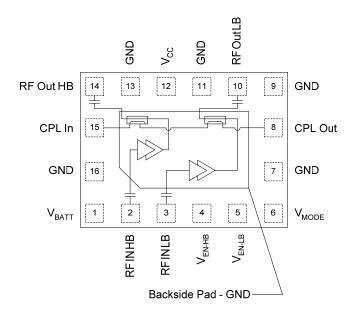

The TQM7M6125 PA Module integrates two high efficiency BiHEMT power amplifiers, two directional couplers and voltage regulation circuitry into a compact 4.0 mm x 3.0 mm package. TriQuint's CuFlip® assembly technology and BiHEMT GaAs process provide a compact, low cost solution optimized for mobile solutions requiring state-of-the-art efficiency and size.

The TQM7M6125 is a dual-broadband power amplifier module covering bands 1, 2, 5 and 8 for use with WCDMA, HSUPA, CDMA, EVDO and LTE modulations. As a result of the combination of high performance, low cost and small size it is well suited for both mobile handset and data card applications.
