

Power Ring Film Capacitors™

SBE Part 775D176980-102

Power Ring Film Capacitor™ 17μF, 8,000Vdc

The 775D176980-102 Power Ring is a 8,000Vdc, $17\mu F$ high voltage pulse capacitor.

SBE Part #: 775D176980-102

Capacitance/Tolerance: 17µF ±10%

DC Voltage Rating: 8,000Vdc

NOTE: This capacitor is specifically designed to withstand repetitive pulse discharges at high pulse currents with longer life than exhibited by more typical metallized High Voltage film capacitors. However, this capacitor is not recommended for applications requiring continuous voltage (constant charge) unless de-rated to 4,000Vdc Maximum. For a technical explanation and further information on the intended uses for this design please contact SBE engineering.

Dielectric/Construction: Patented pulse technology

 ${\it Metallized\ Polypropylene\ film.}$

Series-section design, non-inductively wound.

Dielectric Withstand

Voltage:

Units 100% tested at DC potential of 9,000Vdc for

two minutes at 25°C.

Peak-to-Peak Voltage: 10,000 V Max

When operated at this peak-to-peak voltage the capacitor can be expected to withstand ~5,000 discharges.

Further reducing this value to 7,500 V peak-topeak will increase discharge life on the order of 10 times.

Further reducing this value to 5,600 V peak-topeak will increase this discharge life more than 1,000 times.

Reducing the Q of the discharge circuit will improve shot life for all cases. End of life for the above estimates is 10% capacitance reduction.

Insulation resistance: $5,000 \text{ M}\Omega \text{ Min at } +25^{\circ}\text{C}$

ESR @ 10 kHz: < 0.5 mΩ Min at $+25^{\circ}$ C,

typical

ESL: ~ 50 nH, minimum inductance

connection. The actual capacitor loop inductance will depend on the application

interconnect design.

Operating Temperature: -40°C to +85°C

Peak Current Rating: 34,500 Amps repetitive

Power Ring Film Capacitors™

Mechanical Specifications

Diameter: 8.50" (215.9 mm) **Mechanical Mounting:** If possible mounting of this

unit using the core will help to provide stress relief for the

terminals.

Core: Hollow phenolic core with 2.0"

I.D. Meets UL-94HB Specs.

Terminals: Tin plated copper strap,

0.062" thick by 2.5" wide.

Encapsulation: Outer tape wrap and white

epoxy potting.

3.35" (85 mm)
