LTE Vertical Low PIM Directional Panel Antenna

PAV69278PI

LTE MUTLI-BAND LOW PIM DIRECTIONAL PANEL ANTENNA

The PAV69279PI is a multi-band, low PIM (Passive Intermodulation), high gain directional panel antenna with vertical polarization that covers the 698 – 960 MHz/1710 – 2700 MHz LTE700/Cellular/PCS/AWS/MDS and global GSM900/GSM1800 /UMTS /LTE2600 bands. The radiation patterns are uniform and symmetrical, providing high-level signal density into defined coverage zones. This antenna will greatly enhance the performance of LTE systems and is ideal for indoor applications. The antenna includes a wall mounting bracket, anchors and bolts.

FEATURES

- Performance optimized using Laird proprietary RF optimization tools
- Mounts easily and directly to wall
- UV stable, aesthetically compact Radome with excellent flame rating
- Engineered for superior performance: high dBi gain & excellent VSWR
- Multiple connector and coax options available including fixed Type N(f) and integrated coax pigtail with Type N(f)
- Low PIM performance minimizes interference and improves in-building wireless network coverage and capacity
