High speed thick film thermal printhead (11.8 dots / mm) KD3008-DF54A

Using its expertise in LSI technology, ROHM has developed new high density driver chips for use in the KD3008-DF54A. Capable of being employed for both thermal and thermal transfer printing, with a print speed of 100mm/s, the resulting print heads are the fastest in their class. The high-speed and high-density printing answers the needs of POS, ATM, KIOSK, and ticket printing devices, which are increasingly being called upon to produce graphical output.

Applications

Label printers ATM printers

KIOSK printers

Ticket printers

Features

- The use of a special partial glaze and the latest heating element structure, along with new high-density driver chips that
 can accept big current, has allowed ROHM to achieve print speeds of 100mm/s with using thermal history control, the
 fastest in its class.
- 2) Standard printheads in the line up are capable of 300dpi. They achieve the high resolution needed for graphics and other complex print patterns.

●Dimensions (Unit: mm)

●Equivalent circuit

| STB No. | Dot No. Dots / ST | |
|---------|-------------------|-----|
| 1 | 1 to 640 | 640 |
| 2 | 641 to 1280 | 640 |
| 3 | 1281 to 1920 640 | |
| 4 | 1921 to 2560 | 640 |

| DI No. | Dot No. | Dots / DI | |
|----------------|------------------|-----------|--|
| 1 | 1 1 to 640 640 | | |
| 2 | 641 to 1280 | 640 | |
| 3 1281 to 1920 | | 640 | |
| 4 | 1921 to 2560 640 | | |

Notes

- No technical content pages of this document may be reproduced in any form or transmitted by any
 means without prior permission of ROHM CO.,LTD.
- The contents described herein are subject to change without notice. The specifications for the
 product described in this document are for reference only. Upon actual use, therefore, please request
 that specifications to be separately delivered.
- Application circuit diagrams and circuit constants contained herein are shown as examples of standard
 use and operation. Please pay careful attention to the peripheral conditions when designing circuits
 and deciding upon circuit constants in the set.
- Any data, including, but not limited to application circuit diagrams information, described herein are intended only as illustrations of such devices and not as the specifications for such devices. ROHM CO.,LTD. disclaims any warranty that any use of such devices shall be free from infringement of any third party's intellectual property rights or other proprietary rights, and further, assumes no liability of whatsoever nature in the event of any such infringement, or arising from or connected with or related to the use of such devices.
- Upon the sale of any such devices, other than for buyer's right to use such devices itself, resell or
 otherwise dispose of the same, no express or implied right or license to practice or commercially
 exploit any intellectual property rights or other proprietary rights owned or controlled by
- ROHM CO., LTD. is granted to any such buyer.
- Products listed in this document are no antiradiation design.

The products listed in this document are designed to be used with ordinary electronic equipment or devices (such as audio visual equipment, office-automation equipment, communications devices, electrical appliances and electronic toys).

Should you intend to use these products with equipment or devices which require an extremely high level of reliability and the malfunction of which would directly endanger human life (such as medical instruments, transportation equipment, aerospace machinery, nuclear-reactor controllers, fuel controllers and other safety devices), please be sure to consult with our sales representative in advance.

It is our top priority to supply products with the utmost quality and reliability. However, there is always a chance of failure due to unexpected factors. Therefore, please take into account the derating characteristics and allow for sufficient safety features, such as extra margin, anti-flammability, and fail-safe measures when designing in order to prevent possible accidents that may result in bodily harm or fire caused by component failure. ROHM cannot be held responsible for any damages arising from the use of the products under conditions out of the range of the specifications or due to non-compliance with the NOTES specified in this catalog.

Thank you for your accessing to ROHM product informations.

More detail product informations and catalogs are available, please contact your nearest sales office.
