

## Micropower dual CMOS voltage comparators

Datasheet - production data

### Features

- Low supply current: 5  $\mu$ A typ. per comparator
- Wide single supply range 2.7 V to 16 V or dual supplies ( $\pm 1.35$  V to  $\pm 8$  V)
- Extremely low input bias current: 1 pA typ.

- Input common-mode voltage range includes ground
- Open drain output
- High input impedance:  $10^{12}$   $\Omega$  typ
- Fast response time: 2  $\mu$ s typ. for 5 mV overdrive
- ESD tolerance: 4 kV HBM, 200 V MM

### Related products

- Pin-to-pin and functionally compatible with the dual CMOS TS393 comparators
- See the TSX3702 for push-pull output

### Applications

- Automotive
- Industrial

### Description

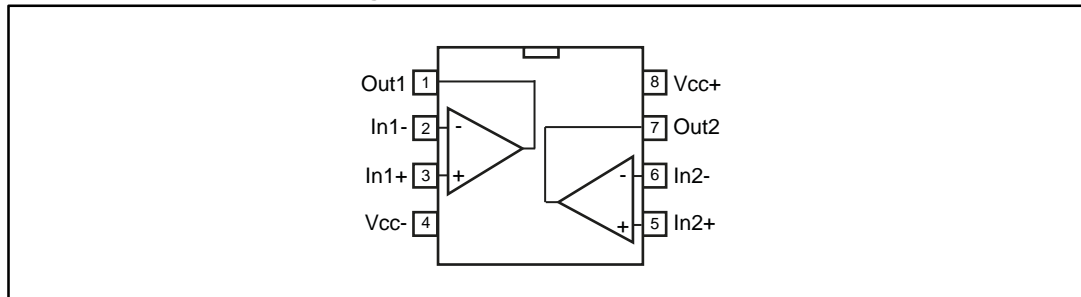

The TSX393 is a micropower CMOS dual voltage comparator which exhibits a very low current consumption of 5  $\mu$ A typical per comparator. This device was designed as the improvement of the TS393: it shows a lower current consumption, a better input offset voltage, and an enhanced ESD tolerance. The TSX393 is fully specified over a wide temperature range and is proposed in automotive grade for the SO8 package. It is fully compatible with the TS393 CMOS comparator and is available with similar packages. New tiny packages (MiniSO8 and DFN8 2x2 mm) are also proposed for the TSX393 thus allowing even more integration on applications.

## 2 Absolute maximum ratings

Table 1: Absolute maximum ratings (AMR)

Symbol	Parameter	Value	Unit	
V <sub>CC+</sub>	Supply voltage <sup>(1)</sup>	18	V	
V <sub>id</sub>	Differential input voltage <sup>(2)</sup>	±18		
V <sub>in</sub>	Input voltage <sup>(3)</sup>	-0.3 to 18		
V <sub>o</sub>	Output voltage	18		
I <sub>o</sub>	Output current	20	mA	
I <sub>F</sub>	Forward current in ESD protection diodes on inputs <sup>(4)</sup>	50		
T <sub>j</sub>	Maximum junction temperature	150	°C	
R <sub>thja</sub>	Thermal resistance junction to ambient <sup>(5)</sup>	SO8	125	°C/W
		TSSOP8	120	
		MiniSO8	190	
		DFN8 2x2	115	
T <sub>stg</sub>	Storage temperature range	-65 to 150	°C	
ESD	HBM: human body model <sup>(6)</sup>	4000	V	
	MM: machine model <sup>(7)</sup>	200		
	CDM: charged device model <sup>(8)</sup>	1500		
	Latch-up immunity	200	mA	

**Notes:**

- <sup>(1)</sup>All voltage values, except the differential voltage, are with respect to network ground terminal
- <sup>(2)</sup>Differential voltages are the non-inverting input terminal with respect to the inverting input terminal
- <sup>(3)</sup>Excursions of input voltages may exceed the power supply level. As long as the common mode voltage (V<sub>icm</sub> = (V<sub>in+</sub>) + (V<sub>in-</sub>)/2) remains within the specified range, the comparator provides a stable output state. However, the maximum current of the input stage, through the ESD diodes (I<sub>F</sub>), must be strictly observed.
- <sup>(4)</sup>Guaranteed by design
- <sup>(5)</sup>Short-circuits can cause excessive heating and destructive dissipation. Values are typical.
- <sup>(6)</sup>According to JEDEC standard JESD22-A114F
- <sup>(7)</sup>According to JEDEC standard JESD22-A115A
- <sup>(8)</sup>According to ANSI/ESD STM5.3.1

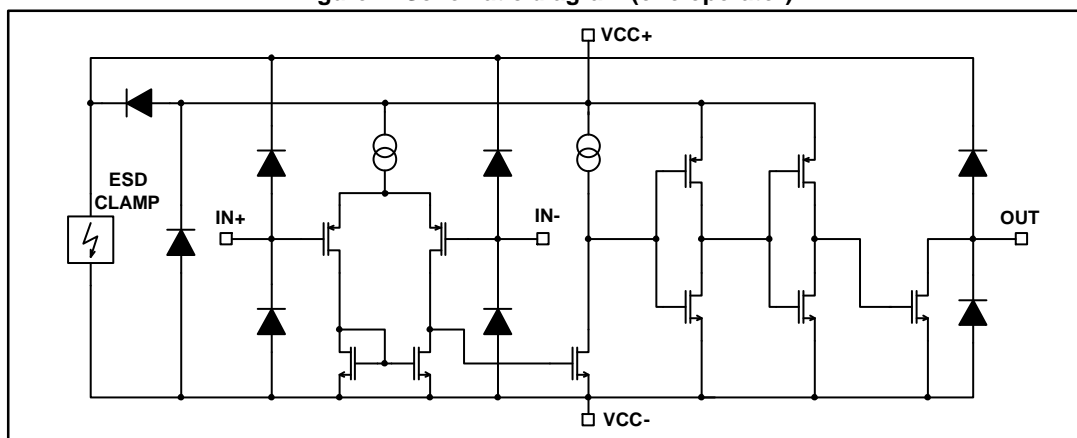

### 3 Operating conditions

Table 2: Operating conditions

Symbol	Parameter	Value	Unit
$V_{CC^+}$	Supply voltage	2.7 to 16	V
$V_{icm}$	Common mode input voltage range	0 to $(V_{CC^+}) - 1.5$	
	$T_{min} \leq T_{amb} \leq T_{max}$	0 to $(V_{CC^+}) - 2$	
$T_{oper}$	Operating free-air temperature range	-40 to 125	°C

# 4 Schematic diagram

## 6 Application information (input voltages)

The ESD strategy used in the TSX393 (and shown in [Figure 2](#) allows input voltages from -0.3 V up to 16 V to be applied regardless of the  $V_{CC+}$  voltage. When  $V_{IN} > V_{CC+}$  a leakage current goes from the input through the protection diode to the ESD clamp. This current is about 0.2 nA at 25 °C and about 250 nA at 125 °C. For a detailed input characteristic see [Figure 12](#). The device is designed to prevent phase reversal.

## 7 Package information

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK® packages, depending on their level of environmental compliance. ECOPACK® specifications, grade definitions and product status are available at: [www.st.com](http://www.st.com). ECOPACK® is an ST trademark.

## 9 Revision history

**Table 11: Document revision history**

Date	Revision	Changes
30-Oct-2014	1	Initial release.
07-Sep-2015	2	Table 1: "Absoluet maximum ratings (AMR)": updated $R_{thja}$ value for the DFN8 2x2 package. Section 7.3 "DFN8 2x2 package information": replaced pacakge outline, mechanical data, and recommended footprint by "non-exposed" pad information.
06-Jun-2016	3	<a href="#">Table 3</a> , <a href="#">Table 4</a> , and <a href="#">Table 5</a> : updated $I_{io}$ and $I_{ib}$ temperature max values, updated $V_{OL}$ condition. In <a href="#">Table 3</a> only, updated $t_{PHL}$ max value. In <a href="#">Table 5</a> only, updated $I_{OH}$ condition. <a href="#">Table 10</a> : updated automotive footnote.
