Detailed technical data

Features

Scanning range	0.5 m 70 m, configurable
Low scanning range	0.5 m 20 m
Great scanning range	9 m 70 m
Number of beams	3
Beam separation	450 mm
Response time	10 ms
Synchronization	Optical synchronisation
Integrated laser alignment aid	✓

Safety-related parameters

Туре	Type 4 (IEC 61496)
Safety integrity level	SIL3 (IEC 61508) SILCL3 (EN 62061)
Category	Category 4 (EN ISO 13849)
Performance level	PL e (EN ISO 13849)
$\ensuremath{PFH_D}$ (mean probability of a dangerous failure per hour)	6.6 x 10 ⁻⁹ (EN ISO 13849)
T _M (mission time)	20 years (EN ISO 13849)
Safe state in the event of a fault	At least one OSSD is in the OFF state.

Functions

	Functions	Delivery status
Restart interlock	1	Internal
External device monitoring (EDM)	1	Activated
Beam coding	1	Uncoded
Sender test	1	Deactivated
Configurable scanning range	1	0.5 m 20 m
Configurable application diagnostic output	1	Contamination (OWS)

	Functions	Delivery status
Safe SICK device communication via EFI	✓	
Muting	✓	

Interfaces

System connection	
Connection type	Hirschmann male connector M26, 12-pin
Permitted cable length	\leq 50 m $^{1)}$
Permitted cross-section	≥ 0.75 mm²
Extension connection	
Connection type	Male connector M12, 5-pin
Configuration method	PC with CDS (Configuration and Diagnostic Software)
Configuration connection	
Connection type	Female connector M8, 4-pin
Display elements	LEDs 7-segment display
Fieldbus, industrial network	
Integration via EFI gateways	CANopen, Ethernet, PROFIBUS DP, PROFIBUS PROFIsafe, PROFINET PROFIsafe $^{2)}$
Integration via Flexi Soft safety controller	CANopen, DeviceNet™, EtherCAT®, EtherNet/IP™, Modbus TCP, PROFIBUS DP, PROFINET ³⁾

 $^{^{1)}}$ Depending on load, power supply and wire cross-section. The technical specifications must be observed.

Electrical data

Protection class	III (EN 50178)
Supply voltage V_S	24 V DC (19.2 V DC 28.8 V DC) ¹⁾
Residual ripple	≤ 10 % ²⁾
Power consumption	≤ 0.2 A: ≤ 0.6 A (depending on type)
Safety outputs (OSSD)	
Type of output	2 PNP semiconductors, short-circuit protected, cross-circuit monitored ³⁾
Switching voltage HIGH	24 V DC (V _S – 2.25 V DC V _S)
Switching voltage LOW	≤ 2 V DC
Switching current	≤ 500 mA
Diagnostic outputs	
Type of output	PNP semiconductor, short-circuit protected
Switching voltage HIGH	24 V DC (V _S - 4.2 V DC V _S)
Switching voltage LOW	High resistance
Switching current	≤ 100 mA

¹⁾ The external voltage supply must be capable of buffering brief mains voltage failures of 20 ms as specified in EN 60204-1. Suitable power supplies are available as accessories from SICK.

Mechanical data

Housing cross-section	52 mm x 55.5 mm
-----------------------	-----------------

²⁾ For a suitable EFI-gateway see modules and gateways in the accessory section of connection systems.

 $^{^{\}rm 3)}$ For additional information on Flexi Soft -> www.sick.com/Flexi_Soft.

 $^{^{2)}}$ Within the limits of V_S.

 $^{^{\}rm 3)}$ Applies to the voltage range between –30 V and +30 V.

M40S-034513AA0, M40E-034513RB0 | M4000 Advanced

MULTIPLE LIGHT BEAM SAFETY DEVICES

Housing material	Aluminum alloy ALMGSI 0.5
Surface treatment	Powder coated
Front screen material	Polycarbonate, scratch-resistant coating

Ambient data

Enclosure rating	IP65 (EN 60529)
Ambient operating temperature	-30 °C +55 °C
Storage temperature	-30 °C +70 °C
Air humidity	15 % 95 %, Non-condensing
Vibration resistance	5 g, 10 Hz 55 Hz (IEC 60068-2-6)
Shock resistance	10 g, 16 ms (IEC 60068-2-29)

Other information

Wave length	950 nm
Integrated laser alignment aid	✓
Laser class	2 (IEC 60825-1), do not stare into beam!
Light source	LED
Type of light	Visible red light
Wave length	630 nm 680 nm
Power consumption	≤ 1 mW

Connection diagram

M4000 Advanced with UE403 switching amplifier connected to UE10-30S safety relay

Task

Connection of an M4000 Advanced multiple light beam safety device with UE403 switching amplifier to a UE10-30S safety relay. Muting with 4 photoelectric reflex switches (dark-switching, PNP).

Operating mode: with restart interlock and external device monitoring.

Operating characteristics

When the light path is clear and the UE10-30S is de-energized and functioning correctly, the yellow LED on the receiver and the H3 lamp flash. The system is ready for switch-on and waits for an input signal/switch-on signal. The system is enabled by pressing and releasing the S1 button. The OSSD1 and OSSD2 outputs are live, the UE10-30S is switched on. On interruption of one or several of the light beams, the UE10-30S is de-energized by the OSSD1 and OSSD2 outputs.

Muting and override

When the light path is clear and the muting input conditions are valid, muting starts. The H1 muting lamp illuminates. Different time and monitoring functions can be configured.

When the light path is interrupted and muting sensors are active, e.g., because of muting errors or a new power on, override is enabled by pressing and releasing the S2 button.

Fault analysis

OSSD cross-circuits and short-circuits are detected and lead to the inhibited state (lock-out). The erroneous behavior of the UE10-30S will be detected. The shutdown function is retained. On manipulation (e.g., jamming) of the S1 button, the system does not enable the output current circuits.

The failure of one muting sensor will be detected by the muting sequence and prohibit a new muting cycle. On manipulation (e.g., jamming) of the S2 button, the system does not enable override. A permanent use of the override function will be inhibited through the device.

Comments

¹⁾ Output circuits: These contacts are to be connected to the controller such that, with the output circuit open, the dangerous state is disabled. For categories 4 and 3, this integration must be dual-channel (x/y paths). Single-channel insertion in the control (z path) is only possible with a single-channel control and by taking the risk analysis into account.

2) PELV in accordance with the requirements in

EN 60204-1 / 6.4

Take note of the operating instructions of the integrated devices. This applies particularly to the use of configurable functions.

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is "Sensor Intelligence."
