1. Description

White lamps for outdoor application are offered in a variety of packages such as 3mm, 5mm, oval type which is suitable for traffic signal and massage board applications with smooth radiation pattern. Advanced epoxy technology has a good moisture resistance and UV protection to be us in package and it can reduce the effect of long term exposure in outdoor environment.

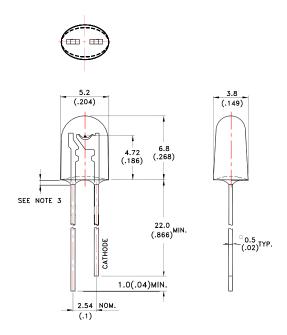

1. 1. Features

- Lead (Pb) free product RoHS compliant
- Low power consumption & High efficiency.
- High efficiency & reliability.
- Versatile mounting on p.c. board or panel.
- I.C. compatible/low current requirement.
- Popular 5mm oval diameter. InGaN White & White Diffused lens.

1.2. Applications

- Massage sign
- Bus sign
- Traffic sign
- Traffic signal

2. Outline Dimensions

Notes:

- 1. All dimensions are in millimeters (inches).
- 2. Tolerance is ±0.25mm (.010") unless otherwise noted.
- 3. Protruded resin under flange is 1.0mm (.04") max.
- 4. Lead spacing is measured where the leads emerge from the package.
- 5. Specifications are subject to change without notice.

3. Absolute Maximum Ratings at TA=25° €

Parameter	Maximum Rating	Unit	
Power Dissipation	96	mW	
Peak Forward Current			
(Duty Cycle≦1/10, Pulse Width≦10ms)	100	mA	
DC Forward Current	30	mA	
Derating Linear From 47°C	0.56	mA/°C	
Operating Temperature Range	-40°C to + 85°C		
Storage Temperature Range	-40°C to + 100°C		
Lead Soldering Temperature			
[2.0mm (.079") From Body]	260°C for 5 Seconds Max.		

4. Electrical / Optical Characteristics at TA=25°C

Parameter	Symbol	Min.	Тур.	Max.	Unit	Test Condition	
Luminous Intensity	IV	2500	3600	5500	mcd	IF = 20mA Note 1,3,4	
Viewing Angle	201/2		110 / 50		deg	Note 2 (Fig.6)	
	х		0.32		nm	IF = 20mA, Note 5	
Chromaticity Coordinates	у		0.33		nm	Hue Spec. Table & Chromaticity Diagram	
Forward Voltage	VF	2.5	2.9	3.2	V	IF = 20mA	
Reverse Current	IR			10	μΑ	VR = 5V	

NOTE:

- 1. Luminous intensity is measured with a light sensor and filter combination that approximates the CIE eye-response curve.
- 2. θ 1/2 is the off-axis angle at which the luminous intensity is half the axial luminous intensity.
- 3. Iv classification code is marked on each packing bag.
- 4. The Iv guarantee must be included with ±15% testing tolerance.
- 5. The chromaticity coordinates (x, y) is derived from the 1931 CIE chromaticity diagram...
- 6. Reverse voltage (VR) condition is applied for IR test only. The device is not designed for reverse operation.

5. Typical Electrical / Optical Characteristics Curves

(25°C Ambient Temperature Unless Otherwise Noted)

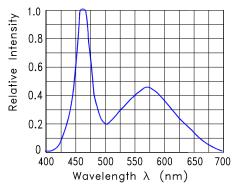

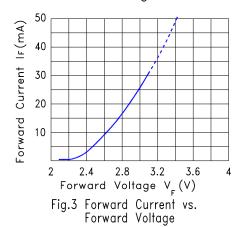

Fig.1 Relative Intensity VS. Wavelength

Relative Luminous Intensity Normalized at 20mA 1.8 1.6 1.4 1.2 1.0 0.8 0.6 0.4 0.2 80 0 20 40 60 100 120 Ambient Temperature TA(°C)

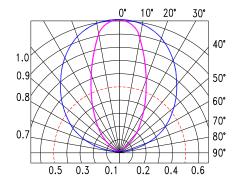

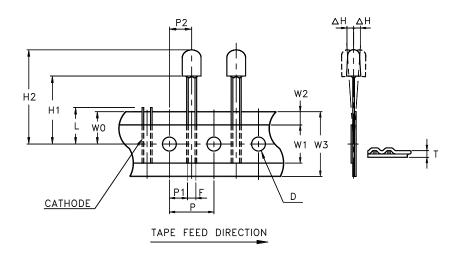

Fig.6 Spatial Distribution

6. Taping Features

- * Compatible with radial lead automatic insertion equipment.
- * Most radial lead plastic lead lamps available packaged in tape and folding.
- * 2.54mm (0.1") straight lead spacing available.
- * Folding packaging simplifies handling and testing.
- * Reel packaging is available by removing suffix "A" on option.

Package Dimensions

		Specification			
ltem	Symbol	Minimum		Maximum	
		mm	inch	mm	inch
Tape Feed Hole Diameter	D	3.8	0.149	4.2	0.165
Component Lead Pitch	F	2.3	0.091	3.0	0.118
Front to Rear Deflection	ΔН			2.0	0.079
Feed Hole to Bottom of Component	H1	17.5	0.688	18.5	0.728
Feed Hole to Overall Component Height	H2	23.8	0.925	25.8	1.015
Lead Length After Component Height	L	V	/0	11.0	0.433
Feed Hole Pitch	Р	12.4	0.488	13.0	0.511
Lead Location	P1	4.4	0.173	5.8	0.228
Center of Component Location	P2	5.05	0.199	7.65	0.301
Total Tape Thickness	Т			0.90	0.035
Feed Hole Location	WO	8.5	0.334	9.75	0.384
Adhesive Tape Position	W2	0	0	3.0	0.118
Tape Width	W3	17.5	0.689	19.0	0.748

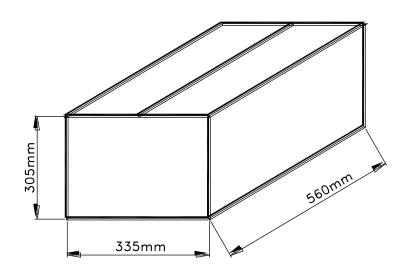

7. Packing Spec.

Total 2,000pcs per inner carton

10 Inner cartons per outer carton
Total 20,000 pcs per outer carton
In every shipping lot, only the last pack will be non-full packing

7. Bin Table Specification

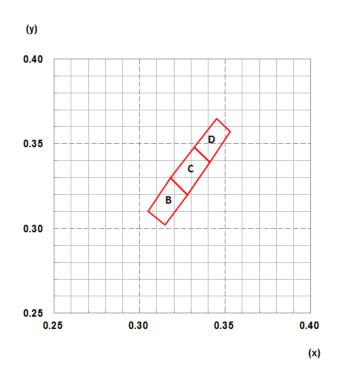

Luminous Intensity Iv (mcd) IF@20mA						
Bin Code Min. Max.						
Т	2500	3200				
U	3200	4200				
V	4200	5500				

Note: Tolerance of each bin limit is ±15%

Hue Ranks	Chromaticity Coordinates, CC(x, y), IF@20mA						
В	х	0.305	0.315	0.328	0.318		
Б	у	0.310	0.302	0.32	0.33		
С	Х	0.318	0.328	0.341	0.332		
	у	0.33	0.32	0.339	0.348		
D	х	0.332	0.341	0.353	0.345		
	у	0.348	0.339	0.357	0.365		

Note: Color Coordinates Measurement allowance is ±0.01

8. CAUTIONS

8.1. Application

This LED lamp is good for application of indoor and outdoor sign, also ordinary electronic equipment.

8.2. Storage

The storage ambient for the LEDs should not exceed 30°C temperature or 70% relative humidity. It is recommended that LEDs out of their original packaging are used within three months. For extended storage out of their original packaging, it is recommended that the LEDs be stored in a sealed container with appropriate desiccant or in desiccators with nitrogen ambient.

8.3. Cleaning

Use alcohol-based cleaning solvents such as isopropyl alcohol to clean the LEDs if necessary.

8.4. Lead Forming & Assembly

During lead forming, the leads should be bent at a point at least 3mm from the base of LED lens. Do not use the base of the lead frame as a fulcrum during forming. Lead forming must be done before soldering, at normal temperature. During assembly on PCB, use minimum clinch force possible to avoid excessive mechanical stress.

8.5. Soldering

When soldering, leave a minimum of 2mm clearance from the base of the lens to the soldering point. Dipping the lens into the solder must be avoided. Do not apply any external stress to the lead frame during soldering while the LED is at high temperature.

Recommended soldering conditions:

	Soldering iron	1	Wave soldering		
Temperature Soldering time Position	350°C Max. 3 seconds Max. (one time only) No closer than 2mm	Pre-heat Pre-heat time Solder wave Soldering time	100°C Max. 60 seconds Max. 260°C Max.		
FUSILIUII	from the base of the epoxy bulb	Dipping Position	5 seconds Max. No lower than 2mm from the base of the epoxy bulb		

Note: Excessive soldering temperature and/or time might result in deformation of the LED lens or catastrophic failure of the LED. IR reflow is not suitable process for through hole type LED lamp product.

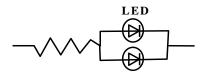

8.6. Drive Method

An LED is a current-operated device. In order to ensure intensity uniformity on multiple LEDs connected in parallel in an application, it is recommended that a current limiting resistor be incorporated in the drive circuit, in series with each LED as shown in Circuit A below.

Circuit model (A)

Circuit model (B)

- (A) Recommended circuit
- (B) The brightness of each LED might appear different due to the differences in the I-V characteristics of those LEDs.

8.7. ESD (Electrostatic Discharge)

Static Electricity or power surge will damage the LED.

Suggestions to prevent ESD damage:

- Use a conductive wrist band or anti- electrostatic glove when handling these LEDs
- All devices, equipment, and machinery must be properly grounded
- Work tables, storage racks, etc. should be properly grounded
- Use ion blower to neutralize the static charge which might have built up on surface of the LEDs plastic lens as a result of friction between LEDs during storage and handing

Suggested checking list:

Training and Certification

- 8.7.1.1. Everyone working in a static-safe area is ESD-certified?
- 8.7.1.2. Training records kept and re-certification dates monitored?

Static-Safe Workstation & Work Areas

- 8.7.2.1. Static-safe workstation or work-areas have ESD signs?
- 8.7.2.2. All surfaces and objects at all static-safe workstation and within 1 ft measure less than 100V?
- 8.7.2.3. All ionizer activated, positioned towards the units?
- 8.7.2.4. Each work surface mats grounding is good?

Personnel Grounding

- 8.7.3.1. Every person (including visitors) handling ESD sensitive (ESDS) items wear wrist strap, heel strap or conductive shoes with conductive flooring?
- 8.7.3.1. If conductive footwear used, conductive flooring also present where operator stand or walk?
- 8.7.3.2. Garments, hairs or anything closer than 1 ft to ESD items measure less than 100V*?
- 8.7.3.3. Every wrist strap or heel strap/conductive shoes checked daily and result recorded for all DLs?
- 8.7.3.4. All wrist strap or heel strap checkers calibration up to date?

Note: *50V for Blue LED.

Device Handling

- 8.7.4.1. Every ESDS items identified by EIA-471 labels on item or packaging?
- 8.7.4.2. All ESDS items completely inside properly closed static-shielding containers when not at static-safe workstation?
- 8.7.4.3. No static charge generators (e.g. plastics) inside shielding containers with ESDS items?
- 8.7.4.4. All flexible conductive and dissipative package materials inspected before reuse or recycle?

Others

- 8.7.5.1. Audit result reported to entity ESD control coordinator?
- 8.7.5.2. Corrective action from previous audits completed?
- 8.7.5.3. Are audit records complete and on file?

9. Reliability Test

Classification	Test Item	Test Condition	Sample Size	Reference Standard
	Operation Life	Ta = Under Room Temperature IF = 30mA Test Time= 1000hrs	45 PCS (CL=90%; LTPD=5%)	MIL-STD-750D:1026 MIL-STD-883G:1005
