## Notes

- Natural convection cooled, 40 W maximum.
- Peak output current lasting less than 30 seconds with duty cycle less than 10%. During peak loading, outputs may go outside of total regulation limits. Peak total power must not exceed 60 W.
- Forced air, 20 CFM at 1 atmosphere, 50 W maximum.
- Figure is peak-to-peak. Output noise is measured across a 50 MHz bandwidth using a 12 inch twisted pair, terminated with a 47 µF capacitor.
- Total regulation is defined as the static output regulation at 25 °C, including initial tolerance, line voltage within stated limits, load currents within stated limits, and output voltages adjusted to their factory settings. Also,  $0.25 < I(A)/I(B) < 5.0$  to maintain stated regulation. This does not apply to the NFS40-7628J power supply as it has regulated auxiliary outputs.
- A minimum load of 0.5 A is required on the +5 V output to obtain full current from the negative output.
- The NFS40 offers the possibility of power sharing between outputs. Consult factory for details.
- Derating curve is application specific for ambient temperatures >50 °C, for optimum reliability no part of the heatsink should exceed 110 °C and no semiconductor case temperature should exceed 115 °C.
- A 4 W minimum load is recommended to achieve the design MTBF.
- Caution: Allow a minimum of 1 second after disconnecting the power when making thermal measurements.
- Three orthogonal axes, sweep at 1 octave/minute, 5 minute dwell at four major resonances.
- The NFS40-7628J has separately linear regulated +12 V and -12 V outputs. The loading conditions in Notes 5 and 6 do not apply.
- This product is only for inclusion by professional installers within other equipment and must not be operated as a stand alone product.
- The 'J' suffix indicates that these parts are Pb-free (RoHS 6/6) compliant.
- NOTICE: Some models do not support all options. Please contact your local Emerson Network Power representative or use the on-line model number search tool at <http://www.PowerConversion.com> to find a suitable alternative.
