

### FDS8926A

### **Dual N-Channel Enhancement Mode Field Effect Transistor**

### **General Description**

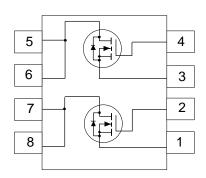

SO-8 N-Channel enhancement mode power field effect transistors are produced using Fairchild's proprietary, high cell density, DMOS technology. This very high density process is especially tailored to provide superior switching performance and minimize on-state resistance. These devices are particularly suited for low voltage applications such as disk drive motor control, battery powered circuits where fast switching, low in-line power loss, and resistance to transients are needed.

### **Features**

- $\begin{tabular}{ll} & \bullet & 5.5~A,~30~V.~R_{\rm DS(ON)} = 0.030~\Omega~@~V_{\rm GS} = 4.5~V \\ & R_{\rm DS(ON)} = 0.038~\Omega~@~V_{\rm GS} = 2.5~V. \\ \end{tabular}$
- High density cell design for extremely low R<sub>DS(ON)</sub>.
- Combines low gate threshold (fully enhanced at 2.5V) with high breakdown voltage of 30 V.
- High power and current handling capability in a widely used surface mount package.
- Dual MOSFET in surface mount package.

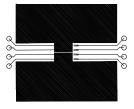

### **Absolute Maximum Ratings** $T_A = 25^{\circ}\text{C}$ unless other wise noted

1.  $R_{g,h}$  is the sum of the junction-to-case and case-to-ambient thermal resistance where the case thermal reference is defined as the solder mounting surface of the drain pins.  $R_{g,c}$  is guaranteed by design while  $\mathbf{R}_{_{\boldsymbol{\theta}\text{CA}}}$  is determined by the user's board design.

a. 78°C/W on a 0.5 in² pad of 2oz copper.

Scale 1 : 1 on letter size paper

2. Pulse Test: Pulse Width  $\leq$  300 $\mu$ s, Duty Cycle  $\leq$  2.0%.

Thermal characterization performed using the conditions described in Note 1c. Transient thermal response will change depending on the circuit board design.

### SO-8 Tape and Reel Data and Package Dimensions

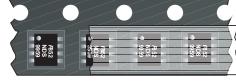

#### **Packaging Description:**

Packaging Description:

SOIC-8 parts are shipped in tape. The carrier tape is made from a dissipative (carbon filled) polycarbonate resin. The cover tape is a multilayer film (Heat Activated Adhesive in nature) primarily composed of polyester film, adhesive layer, sealant, and amit-static sprayed agent. These reeled parts in standard option are shipped with 2,500 units per 13° or 300cm diameter reel. The reels are dark blue in color and is made of polystyrene plastic (antistatic coated). Other option comes in 500 units per 7° or 177cm diameter reel. This and some other options are further described in the Packaging Information table.

These full reles are individually barcode labeled and placed inside a standard intermediate box (illustrated in figure 1.0) made of recyclable corrugated brown paper. One box contains two reels maximum. And these boxes are placed inside a barcode labeled shipping box which comes in different sizes depending on the number of parts shipped.

### **DISCLAIMER**

FAIRCHILD SEMICONDUCTOR RESERVES THE RIGHT TO MAKE CHANGES WITHOUT FURTHER NOTICE TO ANY PRODUCTS HEREIN TO IMPROVE RELIABILITY, FUNCTION OR DESIGN. FAIRCHILD DOES NOT ASSUME ANY LIABILITY ARISING OUT OF THE APPLICATION OR USE OF ANY PRODUCT OR CIRCUIT DESCRIBED HEREIN; NEITHER DOES IT CONVEY ANY LICENSE UNDER ITS PATENT RIGHTS, NOR THE RIGHTS OF OTHERS.

### LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF FAIRCHILD SEMICONDUCTOR CORPORATION. As used herein:

- 1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, or (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in significant injury to the user.
- A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

### PRODUCT STATUS DEFINITIONS

### **Definition of Terms**

Datasheet Identification	Product Status	Definition				
Advance Information	Formative or In Design	This datasheet contains the design specifications for product development. Specifications may change in any manner without notice.				
Preliminary	First Production	This datasheet contains preliminary data, and supplementary data will be published at a later date. Fairchild Semiconductor reserves the right to make changes at any time without notice in order to improve design.				
No Identification Needed	Full Production	This datasheet contains final specifications. Fairchild Semiconductor reserves the right to make changes at any time without notice in order to improve design.				
Obsolete	Not In Production	This datasheet contains specifications on a product that has been discontinued by Fairchild semiconductor. The datasheet is printed for reference information only.
