DESCRIPTION

The LH1502 is a single pole single throw (SPST), normally open and close. The relay can control AC or DC loads currents up to 130 mA, with a supply voltage up to 400 V. The device is packaged in a 8 pin SMD and dual-in line package. Those package offer an insulation dielectric withstand of 3750 VAC_{RMS}.

The coupler consists of a AlGaAs LED that is optically coupled to a dielectrically isolated photodiode array which drives two series connected high voltage MOS transistors.
