

## CMOS Compatible Enable/Disable HS-1370/1380 Series

### Description

The **HS-1370 Series** of quartz crystal oscillators provide enable/disable 3-state CMOS compatible signals for bus connected systems. Supplying Pin 1 of the **HS-1370** units with a logic "0" enables the output on Pin 8. Alternately, supplying pin 1 of the **HS-1380** units with a logic "1" enables its Pin 8 output. In the disabled mode, Pin 8 presents a high impedance to the load. All units are resistance welded in an all metal package, offering RFI shielding, and are designed to survive standard wave soldering operations without damage. Insulated standoffs to enhance board cleaning are standard.

### Features

- Wide frequency range— 0.5MHz to 36MHz
- User specified tolerance available
- Will withstand vapor phase temperatures of 253°C for 4 minutes maximum
