

Product Change Notification

PCN Publish Date: July 07, 2006

PCN #: 017380-041726

Change Title: Product Process Change

Products Affected:

Current Aavid Part Number	6230D	
New RoHS Compliant Part Number	6230DG RoHS √	t

Description of the Change: In an effort to make our product line more compatible with regulatory and environmental guidelines, we are changing the volume manufacturing process for our products to make them RoHS compliant according to Aavid Thermalloy specification RoHS 9000. (Available at http://www.aavidthermalloy.com/RoHS.shtml).

The current version of this product is finished with a solderable tin-lead coating. The RoHS compliant version will have a 100% matte tin finish per ASTM B545 with a nickel under-plate barrier of 1.9 to 3.8 um. Product built using this new finish process is identified with a "G" suffix at the end of the part number as shown above in Products Affected.

Scheduling of Change:

Sample Date: Please contact your local sales representative for sample availability.

Volume Production: Volume production will be available August 06, 2006. New orders should be placed for the "G" suffix product. Please adjust your current orders so that they can be filled accordingly depending upon stock and availability.

EOL of Unchanged Product: Once manufacturing has been converted to the RoHS compliant process, it may still be possible to manufacture products with non-compliant materials. However, products manufactured with non-compliant materials may require a pricing adjustment due to the cost increases associated with lower volume manufacturing.

Customer Impact: Products with matte tin finsh are backward compatible with SN/Pb solder processes.

Qualification Results: For an Aavid Thermalloy qualification reports visit our RoHS website. http://www.aavidthermalloy.com/RoHS.shtml

Contact Information: For question please contact Aavid Thermalloy Technical Support at info@aavid.com or your local sales office.

Please respond with any issues within 30 days of this notification. Lack of acknowledgment of the change constitutes acceptance of the change.
